EXECUTIVE SUMMARY

Full-stack AI Systems Architect specializing in Multi-Agent Swarms, LangGraph Orchestration, Real-time RAG, and High-Performance Cloud Microservices. Creator of 6 Autonomous AI OS platforms generating production-grade automation.

PROFESSIONAL EXPERIENCE & OS PROJECTS

Lead AI Workforce & Swarm Architect | PASHA AI LABS (2023 - Present)

- Built 25-agent Autonomous MNC Operating System utilizing LangGraph multi-agent orchestrator with strict QA critic loops.
- Architected NEURO-RAG self-correcting hybrid RAG engine with Qdrant vector database, Reciprocal Rank Fusion, and DeBERTa-v3 NLI guard attaining 0.96 RAGAS score.
- Engineered VOX-AI customer voice support engine delivering <300ms end-to-end streaming latency across STT, GPT-4o tool calling, and ElevenLabs TTS.

Senior Autonomous Systems Engineer | NEXUS AI SYSTEMS (2021 - 2023)

- Designed PASHA-UNIFIED-OS auto-publishing LinkedIn OS with 4-node LangGraph pipeline driving 40% growth in viral engagement.
- Implemented AUTO-GROWTH marketing engine with 5 CrewAI agents managing real-time SERP and GA4 analytics auto-optimization.
- Created PASHA-GLASS privacy context AR assistant with on-device SQLite face vector gallery and AES encrypted transient cache.

TECHNICAL SKILLS

AI & Agents: LangGraph, CrewAI, Groq Llama 3.3 70B, Qdrant Vector DB, RAGAS, DeBERTa-v3 NLI, Tavily, Playwright

Backend & Systems: Python, FastAPI, Streamlit, PostgreSQL, Redis, Docker, Kubernetes, Microservices, C++

Observability: Prometheus, Grafana, Loki, LogQL, OpenTelemetry, Pytest

EDUCATION & CERTIFICATIONS

B.S. in Computer Science & Artificial Intelligence - Top Tier Institute
